

tick tock

**Did you see it? Can't believe it. As we fall apart
They are coming. Paranoia. It's about to start
Separation. Us and them and.. Do we go to war?
Are they really? Does it matter? Even up the score**

**As we go about our day trying to find a better way
And the world is caving in, we're hoping it will be okay
Well, I know that we have more in common than we don't
We can chase away the hate if we come to- ge-ther....**

**What's the use and.. No excuse but.. Everyone's afraid
Population. Resignation. Is it here to stay?
Finding meaning.. In the moment. Making spirit whole
So distracted. Coming at us. We must appeal to our better angels**

**As we go about our day trying to find a better way
And the world is caving in, we're hoping it will be okay
Well, I know that we have more in common than we don't
We can chase away the hate if we come to- ge-ther....**

**Where did we go wrong, my dear?
Can we get together here?
Must we repeat history?
I Care for you, you care for me ... Can't we?**
